SKILLS

Languages & Frameworks:

C++ Java Python JS/TS HTML/CSS SQL CUDA

Backend:

Node.js Spring Boot Express PostgreSQL MongoDB MySQL GraphQL
REST API Microservices

ML & AI:

LLM Fine-Tuning LLaMA Gemini API MCP

Frontend:

React Next.js Tailwind Stylus D3.js Jest Responsive Design

Cloud & DevOps:

AWS GCP Git GitHub Actions Docker CI/CD

Mobile:

React Native

EXPERIENCE

Stony Brook University

Research Engineer · Graduate Research Assistant

Aug 2025 – Present
Stony Brook, NY

- Architecting a full-stack diabetes platform using Node.js, PostgreSQL, Webhooks, and AWS S3
- Fine-tuning LLaMA 3.1 8B model using qLORA to reduce training time by 40% using a T4 GPU
- Building a React based analytics dashboard for visualising patient health insights

Stony Brook University

Teaching Assistant

Jan 2025 – May 2025
Stony Brook, NY

- Led weekly MATLAB lab sessions and office hours for EEO 306 / ESE 306, supporting students on signal processing, simulation tasks, and code debugging
- Graded assignments and midterms, and resolved student queries on forums by clarifying MATLAB syntax and logic

Stony Brook University — Blockchain Business Lab

Volunteer Researcher

Jun 2024 – Aug 2024
Stony Brook, NY

- Deployed Bitcoin Core node to sync and extract data from 800+ .blk files, enabling scalable blockchain analysis
- Built Python parsing scripts processing 100,000+ transactions/file, transforming blockchain data into structured CSV for analysis

Unilever

Software Developer

Jul 2019 – Sep 2022
Bengaluru, India

- Developed JS and D3.js interactive dashboard to track website metrics in real time, improving reporting speed by 15%
- Built scripts and integrated the fetched data to a D3.js based dashboard to track incident ticket metrics, improving incident response time by 25%
- Designed and prototyped Unilever's Field Force App UI in Figma; collaborated with Android Development team to launch MVP in 4 weeks
- Debugged transaction issues in SAP systems and implemented minor fixes within the SAP systems
- Implemented Python scripts for monthly data extraction from SAP tables for computing key system metrics
- Led implementation of SAP Cash Collections integration, automating workflows, and coordinating with development teams for 100% on-time project delivery

PROJECTS

Self-Hosted Uptime Monitoring Platform

Node.js · Express · PostgreSQL · Docker · React · Gemini API

- Engineered a self-hosted uptime monitoring system capable of handling multiple endpoint checks, deployed via Docker Compose for single-command setup
- Designed automated health-check engine using Axios with configurable intervals, persisting log data in a PostgreSQL powered database
- Integrated Gemini API for intelligent anomaly detection and advanced insights

Atlantis — Agentic AI Troubleshooting & Automation Platform

Python · MCP-Agent · Tavily · MongoDB Atlas · React · Gemini

- Built a full-stack agentic AI system using mcp-agent that routes user queries to multiple MCP tools, enabling web search, system diagnostics, and command execution through controlled tool calls
- Integrated Tavily MCP for fast, source-cited web search and a custom Windows command MCP server to safely run reversible system commands with guardrails and confirmation flows
- Developed a React-based agent console for chat, tool-usage visualization, command previews, and session replay, backed by MongoDB Atlas for logging and per-user preferences
- Implemented safety mechanisms—including whitelisted commands, dry-run previews, and stepwise validation—to ensure secure, sandboxed automation on user devices

AI-Powered Diabetes Management Platform (In Progress)

Node.js · Next.js · PostgreSQL · AWS S3 · LLM Fine-tuning · Generative AI

- Fine-tuned an open-source LLaMA 3.1 model using qLoRA and 4-bit quantization for diabetes-specific health data
- Integrated WhatsApp via Zapier as a data collection pipeline for glucose readings, with planned CGM device support
- Implemented secure AWS S3 pipelines with PII detection and anonymization using AWS Macie for HIPAA-conscious data handling
- Developing a Next.js analytics dashboard and LLM-powered conversational interface; designed workflows and UI in Figma

EDUCATION

Stony Brook University

Master of Science · Computer Engineering

Aug 2023 – May 2025 · Stony Brook, NY

SRM Institute of Science and Technology

Bachelor of Science · Information Technology

Jul 2015 – May 2019 · Chennai, India

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Azure Administrator Associate (In Progress)
